

## PART 3.0 MODIFICATIONS REQUIRED TO CSE SYSTEMS FOR THE SCR-TO-FCR INTERFACE

### 3.1 Overview

The State CSE system must be modified to create a trigger record for each of the following actions:

- Add a case (this includes adding a non IV-D order established on or after October 1, 1998);
- Add a person to a case;
- Change case data (this includes changes to the Case ID, Order Indicator, and Case Type changes from IV-D to non IV-D);
- Change person data:
  - ❖ SSN
  - ❖ Name
  - ❖ Participant Type
  - ❖ Member ID
  - ❖ Family Violence Indicator
  - ❖ Additional SSNs or names
- Delete a person from a case; and
- Close a case.

Reference should be made to the FCR IGD Section 6, “FCR Transaction-Specific Information.” and to appendix K “SCR/FCR Transactions and Responses”. This section links caseworker or system actions that should trigger FCR transactions, as well as identifies FCR returned data that should trigger a State CSE system action or caseworker alert. Figure 3-1 depicts this concept.
